

Museum Curator in the History of Technology

Smithsonian Institution
National Museum of American History
Kenneth E. Behring Center

Division of Work and Industry

Position involves:

Research and publication based on the collections and the interests of the curator, assessing and building collections related to engineering or energy production, creating exhibitions as part of a team, and contributing to public programming.

Scholars working in the social and cultural history of engineering or energy production are preferred. Specializations could include but are not limited to: infrastructure and the built environment, robotics, mining, and oil. Experience working with material culture or in museums a plus. Ph.D. in history, American studies or related field in hand or completed by August of 2018. This is an entry-level position equivalent to an assistant professor.

Starting salary GS-12 - \$81,548 per year, plus benefits

Open through Friday, June 8, 2018, on www.usajobs.gov. Please see Museum Curator announcement #
